Experience

Amazon Web Services (AWS)

Cloud Consultant – Professional Services (DevOps/MLOps)

Aug 2024 – Present
Hyderabad, India

- ♦ **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Architected greenfield AWS landing zone for a data-centre migration into 135+ AWS accounts (50+ application workloads) – designed AWS Organizations OU structure, SCPs, tag policies, and Transit Gateway hub-and-spoke networking with hybrid connectivity (VPN/Direct Connect) and centralized egress inspection. Automated multi-account provisioning via Terraform + GitHub Actions CI/CD, cutting infrastructure setup time by 90% versus manual configuration and enabling phased workload onboarding in days instead of weeks. Enforced preventative SCPs, Config rules, and Security Hub standards – embedding least-privilege and CCM-aligned compliance from day one. Accelerated delivery velocity by integrating Kiro for AI-driven requirement analysis and architecture specs.
- ♦ **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Achieved 10/10 CSAT and 3x consecutive 5/5 Pulse ratings delivering enterprise Terraform modules with automated unit testing (tfctest, PyTest) – enabling a 38+ service self-service platform adopted as the cloud platform standard across application teams. Architected 1000+ preventative security controls aligned with CCMv4.0 compliance, designing governance guardrails that scale with platform growth.
- ♦ **DevOps Consultant – DTCC (Aug 2025 – Dec 2025):** Modernized legacy Terraform infrastructure into secure, cloud-native IaC patterns – unblocking DevSecOps velocity on high-sensitivity financial workloads. Leveraged Amazon Q to accelerate code analysis and migration assessments, compressing manual review cycles and enabling faster downstream infrastructure changes.
- ♦ **MLOps Pipeline (Internal SME Program):** Architected end-to-end SageMaker MLOps pipeline for medical image classification with blue-green endpoint deployment, auto-scaling, and drift detection – enabling zero-downtime model updates with automatic rollback. Provisioned full infrastructure via Terraform + CodePipeline, with CloudFront frontend and API Gateway + Lambda inference API.
- ♦ **Internal Impact:** Published APG pattern “Secure PR Previews & Approval-Gated Releases for Amplify Gen 2” (2 more peer-reviewed). MLOps SME Program Graduate. 5x TFC Ambassador (AI/ML, NGDE, CloudOps, Agentic AI, Serverless). Delivered 2 org-wide tech talks on Terraform testing and GitOps pipeline gating. Associate Speaker Certified.

Ikarus-3D

Software Developer Associate (Internship)

May 2023 – Jul 2023
Mohali, India
