## Summary

**AI Tools & Developer Productivity Engineer** with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, building AI-assisted developer tooling and agent workflows on top of enterprise DevOps engagements. Ship production Claude Code custom skills, MCP servers, hooks, and agents; use Kiro for requirement analysis, architecture documentation, and implementation specs, and Amazon Q for code analysis on financial-services workloads. Maintain a public Claude Code plugin marketplace (16 plugins) and a Bedrock MCP server that puts 26 text models from 7 providers behind one set of credentials. 11 upstream PRs merged across axios, Apache Airflow, Prefect, Feast, awslabs/mcp, awslabs/agent-plugins, multer, and others – including Claude Code agent skills for Feast. 5x AWS TFC Ambassador (Agentic AI, AI/ML, CloudOps, NGDE Graduated, Serverless). 5x AWS certified.

## Experience

**Amazon Web Services (AWS)** Aug 2024 – Present
*ProServe (Cloud Consultant) - DevOps/MLOps* Bengaluru, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account setup from 3+ days to under 4 hours (~90%) by replacing a legacy account-vending pipeline with Terraform Cloud (OIDC) for a data-centre exit and a second landing zone: 4,000+ resources across 20+ workspaces, none failing.
  - Used Kiro and Claude Code for requirement analysis, specs, and design documentation. Stood up the second landing zone foundation in about four weeks, ahead of schedule.
  - Delivered two Transit Gateway hubs with Network Firewall inspection and VPN/Direct Connect, plus self-service onboarding: route table within 15 minutes, firewall access by tag in about a minute.
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization, with organization-wide auto-enable in Terraform. Worked on the security solution behind 1,000+ preventative CCMv4.0 controls (team result). Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC with Amazon Q.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Architected an end-to-end SageMaker MLOps pipeline for medical image classification with blue-green endpoints, auto-scaling, and drift detection. Provisioned infrastructure via Terraform + CodePipeline with CloudFront frontend and API Gateway + Lambda inference API. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample on Organizations governance (see Publications). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2. 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). MLOps SME Program Graduate. Associate Speaker Certified; delivered 2 org-wide tech talks on Terraform testing and GitOps pipeline gating.

**Amazon Web Services (AWS)** Mar 2024 – Jul 2024
*Associate Professional Services – DevOps (Internship)* Hyderabad, India

- Migrated on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy, enabling zero-downtime releases. Established observability with X-Ray and CloudWatch distributed tracing.

**Ikarus-3D** May 2023 – Jul 2023
*Software Developer Associate (Internship)* Mohali, India

- Containerized production application on AWS ECS/ECR with GitHub Actions CI/CD, and deployed SonarQube on EC2 + RDS to embed continuous code quality analysis into the delivery pipeline.

## Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.

## Industry Certifications (5)

**AWS**: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
**AWS**: AI Practitioner | Cloud Practitioner **Anthropic badge**: Claude Partner Badge - Claude Code (Sep 2026)

## Projects

**Claude Cost Optimizer** Mar 2026
*Claude Code Plugin, MCP, TypeScript, React, Python* GitHub | Live
◇ Claude Code plugin, MCP cost server, CLI grader and web calculator for Claude spend. Rebuilt every estimator on cache-aware billing, correcting a modelled 30-turn Opus session from $3.44 to $0.74, and replaced every vague savings range with a sourced or computed number. Golden-value tests pin the cost math in all three implementations.

**itr-agent** Jul 2026
*TypeScript, MCP Protocol, Node.js, Zod* GitHub
◇ Local-first MCP server for Indian income tax: the LLM interviews and calls 12 tools, while a deterministic engine over a versioned JSON rule pack computes every rupee. 151 tests pin it to published worked examples and the statute, on an Ubuntu and Windows CI matrix.

**skillcheck** Jul 2026
*TypeScript, Node.js, GitHub Actions, SARIF* GitHub | Marketplace
◇ Conformance linter for Agent Skills: 36 rules with message-for-message parity to the skills-ref reference validator, SARIF 2.1.0 output and inline PR annotations. Ships as an npm CLI (284 downloads in the last month) and a GitHub Marketplace action.

**Bedrock Multi-Model MCP** Apr 2026
*TypeScript, MCP Protocol, AWS Bedrock Converse API* GitHub
◇ MCP server putting 26 text models from 7 providers, plus image, video and embedding models, behind 8 tools and one set of AWS credentials. Benchmarked in us-east-1: 26 of 26 models answered and 156 of 156 calls succeeded.

**Claude Skills Marketplace** 2026
*TypeScript, Claude Code Skills, MCP Protocol, Plugin System* GitHub
◇ Public Claude Code plugin marketplace with 16 individually installable plugins (dev-workflow, debug triage, Docker deploy, OSS contribution, deps audit, repo polish, refactoring, git advanced), each built around a skill, with slash commands, agents and hooks where the workflow needs them.

**Other Notable Projects:** MCP Toolkit (MCP server middleware packages), SelfHub (MCP personal-memory server), GitScope (Chrome Web Store extension), LeetCode Rating Predictor (train/serve skew fix, NumPy serving), Ledger Sync (self-hosted finance app, 26 pages).

## Open Source Contributions (11 merged upstream)

- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

## Education

**National Institute of Technology Warangal, Telangana** Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

**Sanskar College of Professional Studies (DAVV University), Indore** May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

## Technical Skills

**AI Developer Tools**: Claude Code (custom skills, MCP servers, hooks, agents, plugin marketplaces), Model Context Protocol (MCP), Kiro (AI-driven specs), Amazon Q Developer, GitHub Copilot, Cursor
**Agents & LLMs**: Agent orchestration, tool use, RAG pipelines, prompt engineering, Amazon Bedrock, Anthropic SDK, AWS SDK, LLMOps
**Languages**: TypeScript, Python, JavaScript, HCL, Bash, SQL
**Cloud & Infrastructure**: AWS (Lambda, API Gateway, Bedrock, SageMaker, ECS, Organizations), Terraform, Docker, GitHub Actions, CI/CD
**Frameworks & Runtimes**: Node.js, React, Next.js, FastAPI, Chrome Extensions (Manifest V3), Cloudflare Workers
**Developer Practices**: Test-driven development, tftest + PyTest, code review automation, open-source contribution workflows
