Sagar Gupta

ProServe (Cloud Consultant) - DevOps/MLOps | Amazon Web Services (AWS) | Bengaluru, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

ML Engineer with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, building and shipping ML systems. Fixed a train/serve skew in a LeetCode rating model that had tripled its backtest error (MAE 38.76 to 12.46 on 57 contests). Architected medical image classification pipeline on SageMaker with blue-green endpoints, auto-scaling, and drift detection. Built a neural network framework from scratch in NumPy, backpropagation included. Upstream contributor to Feast feature store, Apache Airflow, and Prefect. 5x AWS certified including **AWS Machine Learning Engineer – Associate** and **AI Practitioner**. LeetCode Guardian, 2166 peak.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Bengaluru, India

- **MLOps Pipeline – SageMaker (SME Program, Jun-Aug 2025):** Built the SageMaker pipeline that trains, gates and ships medical image classification models, with blue-green endpoint deployment, auto-scaling, and PSI drift detection that triggers retraining – zero-downtime updates with automatic rollback on error and latency alarms. Full IaC via Terraform + CodePipeline; API Gateway + Lambda inference API behind CloudFront frontend. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account setup from 3+ days to under 4 hours (∼90%) building the AWS foundation for a data-centre exit and a second landing zone entirely in Terraform.
  - Used Kiro and Claude Code for requirement analysis, specs, and design documentation.
  - Codified Organizations OUs with Control Tower baselines, SCPs, tag policies, and least-privilege account baselines; delivered two Transit Gateway hubs with Network Firewall inspection and self-service network onboarding.
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization. Project closed with a **10/10 CSAT**.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC with Amazon Q.
- **Internal Impact:** Published a second AWS sample on Organizations governance (see Publications). MLOps SME Program Graduate (2025). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2. 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). Associate Speaker Certified.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Migrated on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy – zero-downtime releases. Established observability with X-Ray and CloudWatch distributed tracing.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized production application on AWS ECS/ECR with GitHub Actions CI/CD, and deployed SonarQube on EC2 + RDS to embed continuous code quality analysis into the delivery pipeline.

Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner

Projects

LeetCode Rating Predictor Dec 2023
Python, TensorFlow, NumPy, FastAPI, React, Docker GitHub | Live

◇ Rating model on 15 engineered features. Found and fixed a train/serve skew on participant count that had tripled backtest error (MAE 38.76 to 12.46 on 57 contests). Moved serving to NumPy-only inference pinned by a golden test, cutting the runtime from ~1.8 GB to ~65 MB; a weekly job refreshes the data and re-runs the backtest.

Bedrock Multi-Model MCP Apr 2026
TypeScript, MCP Protocol, AWS Bedrock Converse API GitHub

◇ MCP server putting 26 text models from 7 providers, plus image, video and embedding models, behind 8 tools and one set of AWS credentials. Benchmarked in us-east-1: 26 of 26 models answered and 156 of 156 calls succeeded.

itr-agent Jul 2026
TypeScript, MCP Protocol, Node.js, Zod GitHub

◇ Local-first MCP server for Indian income tax: the LLM interviews and calls 12 tools, while a deterministic engine over a versioned JSON rule pack computes every rupee. 151 tests pin it to published worked examples and the statute, on an Ubuntu and Windows CI matrix.

Claude Cost Optimizer Mar 2026
Claude Code Plugin, MCP, TypeScript, React, Python GitHub | Live

◇ Claude Code plugin, MCP cost server, CLI grader and web calculator for Claude spend. Rebuilt every estimator on cache-aware billing, correcting a modelled 30-turn Opus session from $3.44 to $0.74, and replaced every vague savings range with a sourced or computed number. Golden-value tests pin the cost math in all three implementations.

Other Notable Projects: GroundZeroNN (neural network from scratch in NumPy), GitScope (Chrome Web Store extension), Ledger Sync (self-hosted finance app, 26 pages).

Open Source Contributions (11 merged upstream)

- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Technical Skills

ML & Deep Learning: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas; Dense Networks, CNNs, LSTMs, Ensemble Methods, Feature Engineering, Model Evaluation (MAE/RMSE, precision/recall)
MLOps on AWS: SageMaker (Training, Pipelines, Endpoints, Custom PSI drift jobs), Blue-Green Deployments, Model Versioning, CodePipeline, Feast Feature Store
GenAI & LLMs: Amazon Bedrock, RAG Pipelines, LLM APIs (Anthropic, OpenAI), MCP Protocol, Prompt Engineering, Claude Code, Amazon Q, Kiro
Serving & Infrastructure: FastAPI, Lambda, API Gateway, CloudFront, Docker, Terraform, GitHub Actions, GraphQL
Languages: Python, SQL, TypeScript, JavaScript, HCL, C++, Java
