Sagar Gupta

ProServe (Cloud Consultant) - DevOps/MLOps | Amazon Web Services (AWS) | Bengaluru, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

Cloud Engineer with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, building multi-account AWS platforms for enterprise financial-services and technology customers. Currently building the Terraform foundation for RWS's data-centre exit and a second landing zone: Organizations OUs with Control Tower baselines, SCPs, tag policies, and two Transit Gateway hubs with Network Firewall inspection and VPN/Direct Connect. Worked on CCMv4.0-aligned landing zone controls at State Street (1,000+ preventative controls, team result) and modernized cloud-native IaC at DTCC. Terraform module and Landing Zone specialist; 11 upstream PRs merged (axios, Airflow, lucide, Prefect, Feast, awslabs/mcp, multer, and others). 5x AWS certified including Solutions Architect – Associate.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Bengaluru, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account setup from 3+ days to under 4 hours (~90%) by building the AWS foundation for a data-centre exit and a second landing zone entirely in Terraform.
  - Delivered two Transit Gateway hubs in separate AWS Regions with Network Firewall inspection and VPN/Direct Connect; self-service onboarding gives each new workload its route table within 15 minutes and firewall access by tag in about a minute.
  - Codified Organizations OUs with Control Tower baselines, SCPs, tag policies, and least-privilege account baselines with a security baseline (IMDSv2, EBS encryption, no default VPC).
  - Won approval for AWS IPAM by measuring real billing in a sandbox (prefix delegation, about 94% lower projected cost).
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement with delegated admin in the Audit account via an AFT customization. Worked on the security solution behind 1,000+ preventative CCMv4.0 controls (team result). Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC with Amazon Q.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Provisioned end-to-end SageMaker MLOps infrastructure via Terraform + CodePipeline – blue-green endpoints with auto-scaling, CloudFront frontend, API Gateway + Lambda inference, drift-triggered retraining, and alarm-driven automatic rollback. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample on Organizations governance (see Publications). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2. MLOps SME Program Graduate. 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). 2 org-wide tech talks on Terraform testing and GitOps gating. Associate Speaker Certified.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Migrated on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy – zero-downtime releases with X-Ray and CloudWatch distributed tracing.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized production application on AWS ECS/ECR with GitHub Actions CI/CD; deployed SonarQube on EC2 + RDS for continuous code quality analysis.

Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner

Projects

Blue-Green AWS Terraform Jul 2025
Terraform, ECS on EC2, ALB, CodePipeline, CodeDeploy GitHub
◇ 15 Terraform modules for ECS blue/green on an EC2 Auto Scaling Group: 30% canary for 1 minute with rollback on a 5xx spike or unhealthy target, an 80% coverage gate in CodeBuild, and 8 `terraform test` files on a mock provider, plus Checkov and tflint on every PR.

Bedrock Multi-Model MCP Apr 2026
TypeScript, MCP Protocol, AWS Bedrock Converse API GitHub
◇ MCP server putting 26 text models from 7 providers, plus image, video and embedding models, behind 8 tools and one set of AWS credentials. Benchmarked in us-east-1: 26 of 26 models answered and 156 of 156 calls succeeded.

Claude Cost Optimizer Mar 2026
Claude Code Plugin, MCP, TypeScript, React, Python GitHub | Live
◇ Claude Code plugin, MCP cost server, CLI grader and web calculator for Claude spend. Rebuilt every estimator on cache-aware billing, correcting a modelled 30-turn Opus session from $3.44 to $0.74, and replaced every vague savings range with a sourced or computed number. Golden-value tests pin the cost math in all three implementations.

GitScope Mar 2026
JavaScript, Chrome Extension (Manifest V3), GitHub GraphQL, Cloudflare Workers GitHub | Chrome Web Store
◇ Published Chrome extension adding GitHub profile insights (9-stat grid, language breakdown, activity heatmap, profile comparison). OAuth runs in a Cloudflare Worker so secrets stay server-side, with 5-minute caching and zero runtime dependencies.

Other Notable Projects: LeetCode Rating Predictor (train/serve skew fix, NumPy serving), itr-agent (deterministic tax engine, 151 tests), DevOps-AWS-FARM (Docker + GitHub Actions OIDC deploy to ECR/ECS), Ledger Sync (self-hosted finance app, 26 pages), Instagram Likes Leaderboard (browser-console tool).

Open Source Contributions (11 merged upstream)

- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Technical Skills

AWS Multi-Account & Governance: Organizations, OU Design, SCPs, Tag Policies, Landing Zone, Control Tower, AWS Config, Security Hub, IAM Identity Center, Service Catalog, CloudTrail, GuardDuty
Networking & Hybrid Connectivity: Transit Gateway (hub-and-spoke), VPC, VPN, Direct Connect, PrivateLink, Route 53 Resolver, Centralized Egress Inspection, Network Firewall
Compute & Application Services: ECS Fargate, Lambda, API Gateway, CloudFront, ALB/NLB, EventBridge, Step Functions, SageMaker
Infrastructure as Code: Terraform (modules, tftest, PyTest), CloudFormation, HCL, Multi-Account Strategy, Docker
CI/CD & Automation: GitHub Actions, CodePipeline, CodeBuild, CodeDeploy, Blue-Green Deployments, GitOps, Policy-as-Code
Security & Compliance: CCMv4.0, Preventative SCPs, KMS, Least-Privilege IAM, Config Rules, Security Hub Standards, Amazon Q
Languages: HCL, Python, TypeScript, JavaScript, Bash, SQL
