Sagar Gupta

ProServe (Cloud Consultant) - DevOps/MLOps | Amazon Web Services (AWS) | Bengaluru, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

Platform Engineer with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, delivering self-service infrastructure platforms and multi-account governance for regulated enterprises. Wrote Terraform for about 10 AWS services on State Street's landing zone team, part of the path that opened 38+ services to application teams. Built RWS's AWS foundation in Terraform with self-service network onboarding, cutting per-account provisioning from 3+ days to under 4 hours (∼90%). 5x AWS certified. Author of 2 samples published by AWS (aws-samples). 11 upstream PRs merged across axios, Airflow, lucide, Prefect, Feast, awslabs/mcp, multer, and others.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Bengaluru, India

- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened **38+ services to application teams**. Designed Amazon Detective enablement: delegated admin moved from the Control Tower management account to the Audit account via an AFT customization, with organization-wide auto-enable in Terraform. Worked on the security solution behind **1,000+ preventative controls** aligned with CCMv4.0 (team result). Project closed with a **10/10 CSAT**.
- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account provisioning from **3+ days to under 4 hours (∼90%)** by moving account vending off a legacy pipeline into Terraform.
  - Built **self-service network onboarding** on two Transit Gateway hubs: each new workload gets its route table within 15 minutes and firewall access by tag in about a minute, with no network-team ticket.
  - Codified Organizations OUs with Control Tower baselines, SCPs, tag policies, and least-privilege account baselines with IAM Identity Center, AWS Backup, and SSM Patch Manager in every workload account; every change ran in a sandbox mirror first through the same least-privilege role.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC with Amazon Q.
- **MLOps Platform (SME Program):** Provisioned the platform layer for a SageMaker medical-image classification pipeline via Terraform + CodePipeline – blue-green endpoints, auto-scaling, drift detection, CloudFront frontend, API Gateway + Lambda inference – exposing MLOps as a repeatable pattern rather than a bespoke build. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample on Organizations governance (see Publications). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2. MLOps SME Program Graduate. **5x TFC Ambassador** (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). 2 org-wide tech talks on Terraform testing and GitOps pipeline gating. Associate Speaker Certified.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Enabled zero-downtime releases by migrating an on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy. Established observability with X-Ray and CloudWatch distributed tracing.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized a production application on AWS ECS/ECR with GitHub Actions CI/CD, and deployed SonarQube on EC2 + RDS to embed continuous code-quality analysis into the delivery pipeline.

Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner

Projects

Blue-Green AWS Terraform Jul 2025
Terraform, ECS on EC2, ALB, CodePipeline, CodeDeploy GitHub
◇ 15 Terraform modules for ECS blue/green on an EC2 Auto Scaling Group: 30% canary for 1 minute with rollback on a 5xx spike or unhealthy target, an 80% coverage gate in CodeBuild, and 8 `terraform test` files on a mock provider, plus Checkov and tflint on every PR.

skillcheck Jul 2026
TypeScript, Node.js, GitHub Actions, SARIF GitHub | Marketplace
◇ Conformance linter for Agent Skills: 36 rules with message-for-message parity to the skills-ref reference validator, SARIF 2.1.0 output and inline PR annotations. Ships as an npm CLI (284 downloads in the last month) and a GitHub Marketplace action.

Bedrock Multi-Model MCP Apr 2026
TypeScript, MCP Protocol, AWS Bedrock Converse API GitHub
◇ MCP server putting 26 text models from 7 providers, plus image, video and embedding models, behind 8 tools and one set of AWS credentials. Benchmarked in us-east-1: 26 of 26 models answered and 156 of 156 calls succeeded.

Claude Cost Optimizer Mar 2026
Claude Code Plugin, MCP, TypeScript, React, Python GitHub | Live
◇ Claude Code plugin, MCP cost server, CLI grader and web calculator for Claude spend. Rebuilt every estimator on cache-aware billing, correcting a modelled 30-turn Opus session from $3.44 to $0.74, and replaced every vague savings range with a sourced or computed number. Golden-value tests pin the cost math in all three implementations.

Other Notable Projects: MCP Toolkit (MCP server middleware packages), SelfHub (MCP personal-memory server), LeetCode Rating Predictor (train/serve skew fix, NumPy serving), GitScope (Chrome Web Store extension), Instagram Likes Leaderboard (browser-console tool).

Open Source Contributions (11 merged upstream)

- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Technical Skills

Platform & Governance: AWS Organizations, SCPs, Tag Policies, Landing Zone, Control Tower, AWS Config, Security Hub, IAM Identity Center, Service Catalog, CCMv4.0 controls
IaC & Module Design: Terraform (module libraries, tftest, PyTest, remote state, provider pinning), HCL, Terragrunt, semantic versioning, module registries
CI/CD & Developer Experience: GitHub Actions, CodePipeline, CodeBuild, CodeDeploy, OIDC federation, approval gates, blue-green and canary deployments, GitOps
Networking & Cloud Services: Transit Gateway, Direct Connect, VPN, centralized egress inspection, VPC, PrivateLink, Route 53, ECS/Fargate, Lambda, API Gateway, EventBridge, CloudFront, CloudWatch, X-Ray
AI-Assisted Platform Tooling: Claude Code (custom skills, MCP servers, hooks, agents), Amazon Q, Kiro, MCP Protocol, GitHub Copilot
Languages: Python, HCL, TypeScript, JavaScript, Bash, SQL
