Sagar Gupta

ProServe (Cloud Consultant) - DevOps/MLOps | Amazon Web Services (AWS) | Bengaluru, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

Software Engineer (full-stack) with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, shipping Python and TypeScript across React, FastAPI, and Node.js. Codified RWS's AWS foundation in Terraform: 4,000+ resources across 20+ Terraform Cloud workspaces, none failing. Built and published a Chrome extension (Manifest V3, GraphQL, Cloudflare Workers) on the Chrome Web Store. LeetCode Guardian – 2166 peak rating (top 1.1%), 1300+ problems, 107 contests; Rank 1289 in Google Kick Start Round E '22. Merged 11 upstream PRs into axios, Apache Airflow, lucide, Prefect, Feast, awslabs/mcp, multer, and others. MCA, NIT Warangal (CGPA 8.38).

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Bengaluru, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account setup from 3+ days to under 4 hours (~90%) by replacing a legacy account-vending pipeline with Terraform for a data-centre exit and a second landing zone: 4,000+ resources across 20+ Terraform Cloud workspaces, none failing.
  - Built self-service network onboarding on two Transit Gateway hubs: each new workload gets its route table within 15 minutes and firewall access by tag in about a minute.
  - Won approval for AWS IPAM by measuring real billing in a sandbox (about 94% lower projected cost).
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization, with organization-wide auto-enable in Terraform. Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Refactored legacy Terraform to cloud-native IaC with Amazon Q.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Built the full serving stack for a SageMaker medical image classifier – TensorFlow training jobs, blue-green deployment to a TensorFlow Serving endpoint, a Python Lambda inference API behind API Gateway, a static CloudFront web UI, and Terraform + CodePipeline delivery with drift detection and automatic rollback. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample on Organizations governance (see Publications). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2; 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless); delivered 2 org-wide tech talks (Terraform testing, GitOps pipeline gating).

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Shipped an on-premises to AWS ECS migration with blue-green deployment via Terraform, CodePipeline, and CodeDeploy, delivering zero-downtime releases. Instrumented distributed tracing with X-Ray and CloudWatch.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized a production 3D-asset service on AWS ECS/ECR with a GitHub Actions CI/CD pipeline and integrated SonarQube on EC2 + RDS to enforce code-quality gates on every merge.

Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.
- Rank 1289 – Google Kick Start Round E '22. *Certificate*

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner

Projects

Kinfolk Jul 2026
TypeScript, Next.js 16, React 19, Drizzle, Neon Postgres GitHub | Live
◇ Collaborative family graph modelled as a directed acyclic graph, not a tree: each relative keeps their own record and consent links join them, so nothing is overwritten. Live on Vercel + Neon with a production health check; regression tests run on an in-memory PGlite database.

Ledger Sync Jan 2026
TypeScript, React, FastAPI, SQLite, Tailwind CSS GitHub | Live
◇ Self-hosted personal-finance app across 26 pages: imports .xlsx/.xls/.csv statements with deterministic SHA-256 transaction IDs so repeated imports stay idempotent, plus an AI assistant backed by 15 read-only tool calls (multi-provider LLM).

itr-agent Jul 2026
TypeScript, MCP Protocol, Node.js, Zod GitHub
◇ Local-first MCP server for Indian income tax: the LLM interviews and calls 12 tools, while a deterministic engine over a versioned JSON rule pack computes every rupee. 151 tests pin it to published worked examples and the statute, on an Ubuntu and Windows CI matrix.

GitScope Mar 2026
JavaScript, Chrome Extension (Manifest V3), GitHub GraphQL, Cloudflare Workers GitHub | Chrome Web Store
◇ Published Chrome extension adding GitHub profile insights (9-stat grid, language breakdown, activity heatmap, profile comparison). OAuth runs in a Cloudflare Worker so secrets stay server-side, with 5-minute caching and zero runtime dependencies.

LeetCode Rating Predictor Dec 2023
Python, TensorFlow, NumPy, FastAPI, React, Docker GitHub | Live
◇ Rating model on 15 engineered features. Found and fixed a train/serve skew on participant count that had tripled backtest error (MAE 38.76 to 12.46 on 57 contests). Moved serving to NumPy-only inference pinned by a golden test, cutting the runtime from ~1.8 GB to ~65 MB; a weekly job refreshes the data and re-runs the backtest.

Other Notable Projects: Code Arena (competitive coding arena frontend), Instagram Likes Leaderboard (browser-console tool), Bedrock Multi-Model MCP (26 text models, 156 of 156 benchmark calls), Claude Cost Optimizer (cache-aware Claude cost model), skillcheck (Agent Skills linter, 284 npm downloads a month).

Open Source Contributions (11 merged upstream)

- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Technical Skills

Languages: Python, TypeScript, JavaScript, C++, Java, Go, SQL, HCL, Bash
Frontend: React, Next.js, Preact, Tailwind CSS, Vite, Chrome Extensions (Manifest V3)
Backend & APIs: FastAPI, Node.js, Express, GraphQL, REST, WebSockets, gRPC
Data & Storage: PostgreSQL, MongoDB, SQLite, Redis, DynamoDB, schema design, query optimization
Systems & Infra: Docker, GitHub Actions, AWS (ECS, Lambda, API Gateway, S3, CloudFront), Terraform, Linux
CS Foundations: Data Structures & Algorithms, System Design, OOP, OS, DBMS, Computer Networks
