Experience

Amazon Web Services (AWS) Aug 2024 – Present
Cloud Consultant – Professional Services (DevOps/MLOps) Hyderabad, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Built the AWS foundation for a data-centre exit and a second landing zone entirely in Terraform, replacing a legacy account-vending pipeline: 4,000+ resources across 20+ Terraform Cloud workspaces, none failing, and per-account setup cut from 3+ days to under 4 hours (~90%). Delivered self-service network onboarding on two Transit Gateway hubs: each new workload gets its route table within 15 minutes and firewall access by tag in about a minute. Won approval for AWS IPAM by measuring real billing in a sandbox (about 94% lower projected cost).
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization, with organization-wide auto-enable in Terraform. Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Refactored legacy Terraform into modular, cloud-native IaC on high-sensitivity financial workloads. Used Amazon Q to accelerate code analysis and migration assessments.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Built the full serving stack for a SageMaker medical image classifier – TensorFlow training job, blue-green endpoint deployment, FastAPI inference API behind API Gateway + Lambda, React/CloudFront frontend, and Terraform + CodePipeline delivery with drift detection and automatic rollback. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample, Terraform for AWS Organizations governance on Control Tower (aws-samples, MIT-0), covering all six policy types, Control Tower controls, and delegated admin for 15 services. Published APG pattern on AWS Prescriptive Guidance (*Secure PR Previews and Approval-Gated Releases for Amplify Gen 2*, plus 2 more peer-reviewed in publication pipeline); 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless); delivered 2 org-wide tech talks (Terraform testing, GitOps pipeline gating).

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Shipped an on-premises to AWS ECS migration with blue-green deployment via Terraform, CodePipeline, and CodeDeploy, delivering zero-downtime releases. Instrumented distributed tracing with X-Ray and CloudWatch.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized a production 3D-asset service on AWS ECS/ECR with a GitHub Actions CI/CD pipeline and integrated SonarQube on EC2 + RDS to enforce code-quality gates on every merge.
