Sagar Gupta

ProServe (Cloud Consultant) - DevOps/MLOps | Amazon Web Services (AWS) | Bengaluru, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

Platform Engineer with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, delivering self-service infrastructure platforms and multi-account governance for regulated enterprises. Wrote Terraform for about 10 AWS services on State Street's landing zone team, part of the path that opened 38+ services to application teams. Built RWS's AWS foundation in Terraform with self-service network onboarding, cutting per-account provisioning from 3+ days to under 4 hours (∼90%). 5x AWS certified. Author of 3 samples published by AWS (aws-samples). 11 upstream PRs merged across axios, Airflow, lucide, Prefect, Feast, awslabs/mcp, multer, and others.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Bengaluru, India

- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened **38+ services to application teams**. Designed Amazon Detective enablement: delegated admin moved from the Control Tower management account to the Audit account via an AFT customization, with organization-wide auto-enable in Terraform. Worked on the security solution behind **1,000+ preventative controls** aligned with CCMv4.0 (team result). Project closed with a **10/10 CSAT**.
- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account provisioning from **3+ days to under 4 hours (∼90%)** by moving account vending off a legacy pipeline into Terraform.
  - Built **self-service network onboarding** on two Transit Gateway hubs: each new workload gets its route table within 15 minutes and firewall access by tag in about a minute, with no network-team ticket.
  - Codified Organizations OUs with Control Tower baselines, SCPs, tag policies, and least-privilege account baselines with IAM Identity Center, AWS Backup, and SSM Patch Manager in every workload account; every change ran in a sandbox mirror first through the same least-privilege role.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC with Amazon Q.
- **MLOps Platform (SME Program):** Provisioned the platform layer for a SageMaker medical-image classification pipeline via Terraform + CodePipeline – blue-green endpoints, auto-scaling, drift detection, CloudFront frontend, API Gateway + Lambda inference – exposing MLOps as a repeatable pattern rather than a bespoke build. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published two more AWS samples in Terraform, on Organizations governance and a Bedrock AgentCore agent (see Publications). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2. MLOps SME Program Graduate. **5x TFC Ambassador** (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). 2 org-wide tech talks on Terraform testing and GitOps pipeline gating. Associate Speaker Certified.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Enabled zero-downtime releases by migrating an on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy. Established observability with X-Ray and CloudWatch distributed tracing.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized a production application on AWS ECS/ECR with GitHub Actions CI/CD, and deployed SonarQube on EC2 + RDS to embed continuous code-quality analysis into the delivery pipeline.

Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **Published by AWS:** aws-samples/sample-agentcore-harness-agent-terraform (author, MIT-0) – Terraform for a Bedrock AgentCore agent (71 resources in 12 files): MCP tools behind AgentCore Gateway with a default-deny Cedar policy, PROD promotion only after an evaluation passes, CloudWatch alarms, a canary and a budget. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner

Projects

Ledger Sync Jan 2026
React 19, TypeScript, FastAPI, SQLAlchemy, Neon PostgreSQL, Vercel GitHub | Live
◇ Self-hosted personal-finance app: imports .xlsx, .xls and .csv bank statements with SHA-256 transaction IDs so re-imports stay idempotent, then serves 26 analytics pages (Indian fiscal-year tax planning, investments, FIRE, multi-currency) and an AI assistant limited to 15 read-only tool calls. FastAPI on Vercel over Neon PostgreSQL, React on GitHub Pages, with 298 test files across both stacks.

orrery Oct 2026
Agent Skill, Claude Code Plugin, Node.js, ELK, SVG GitHub | Gallery
◇ Agent Skill that turns a YAML spec into animated architecture diagrams with 18,209 official icons (AWS, Azure, Google Cloud, Kubernetes, GitHub, IBM), each cloud pack rebuilt from the vendor's own download and pinned by checksum. ELK auto-layout, a validator whose every finding names the fix, and a review board of 3 reviewer agents; 40 reference diagrams are rendered and checked in CI. Runs in Claude Code, Codex, Cursor, Gemini CLI and Kiro.

Blue-Green AWS Terraform Jul 2025
Terraform, ECS on EC2, ALB, CodePipeline, CodeDeploy GitHub
◇ 15 Terraform modules for ECS blue/green on an EC2 Auto Scaling Group: 30% canary for 1 minute with rollback on a 5xx spike or unhealthy target, an 80% coverage gate in CodeBuild, and 8 `terraform test` files on a mock provider, plus Checkov and tflint on every PR.

skillcheck Jul 2026
TypeScript, Node.js, GitHub Actions, SARIF GitHub | Marketplace
◇ Conformance linter for Agent Skills: 36 rules with message-for-message parity to the skills-ref reference validator, SARIF 2.1.0 output and inline PR annotations. Ships as an npm CLI (284 downloads in the last month) and a GitHub Marketplace action.

Bedrock Multi-Model MCP Apr 2026
TypeScript, MCP Protocol, AWS Bedrock Converse API GitHub
◇ MCP server putting 26 text models from 7 providers, plus image, video and embedding models, behind 8 tools and one set of AWS credentials. Benchmarked in us-east-1: 26 of 26 models answered and 156 of 156 calls succeeded.

Other Notable Projects: Claude Cost Optimizer (cache-aware Claude cost model), MCP Toolkit (MCP server middleware packages), SelfHub (MCP personal-memory server), LeetCode Rating Predictor (train/serve skew fix, NumPy serving), GitScope (Chrome Web Store extension).

Open Source Contributions (11 merged upstream)

- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Technical Skills

Platform & Governance: AWS Organizations, SCPs, Tag Policies, Landing Zone, Control Tower, AWS Config, Security Hub, IAM Identity Center, Service Catalog, CCMv4.0 controls
IaC & Module Design: Terraform (module libraries, tftest, PyTest, remote state, provider pinning), HCL, Terragrunt, semantic versioning, module registries
CI/CD & Developer Experience: GitHub Actions, CodePipeline, CodeBuild, CodeDeploy, OIDC federation, approval gates, blue-green and canary deployments, GitOps
Networking & Cloud Services: Transit Gateway, Direct Connect, VPN, centralized egress inspection, VPC, PrivateLink, Route 53, ECS/Fargate, Lambda, API Gateway, EventBridge, CloudFront, CloudWatch, X-Ray
AI-Assisted Platform Tooling: Claude Code (custom skills, MCP servers, hooks, agents), Amazon Q, Kiro, MCP Protocol, GitHub Copilot
Languages: Python, HCL, TypeScript, JavaScript, Bash, SQL
