Worked on CCMv4.0-aligned landing zone controls at State Street (1,000+ preventative controls, team result) and modernized cloud-native IaC at DTCC. Terraform module and Landing Zone specialist; 11 upstream PRs merged (axios, Airflow, lucide, Prefect, Feast, awslabs/mcp, multer, and others). 5x AWS certified including Solutions Architect – Associate.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Hyderabad, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Built the AWS foundation for a data-centre exit and a second landing zone entirely in Terraform: Organizations OUs with Control Tower baselines, SCPs, tag policies, and a security baseline in every account (IMDSv2, EBS encryption, no default VPC). Delivered two Transit Gateway hubs in separate AWS Regions with Network Firewall inspection and VPN/Direct Connect, plus self-service onboarding: each new workload gets its route table within 15 minutes and firewall access by tag in about a minute. Won approval for AWS IPAM by measuring real billing in a sandbox (prefix delegation, about 94% lower projected cost). Cut per-account setup from 3+ days to under 4 hours (~90%).
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement with delegated admin in the Audit account via an AFT customization. Worked on the security solution behind 1,000+ preventative CCMv4.0 controls (team result). Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC patterns on high-sensitivity financial workloads. Used Amazon Q to accelerate code analysis and migration assessments across multiple workstreams.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Provisioned end-to-end SageMaker MLOps infrastructure via Terraform + CodePipeline – blue-green endpoints with auto-scaling, CloudFront frontend, API Gateway + Lambda inference, and drift detection with automatic rollback. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample, Terraform for AWS Organizations governance on Control Tower (aws-samples, MIT-0), covering all six policy types, Control Tower controls, and delegated admin for 15 services. Published APG pattern "Secure PR Previews and Approval-Gated Releases for Amplify Gen 2 with GitHub" on AWS Prescriptive Guidance (plus 2 more peer-reviewed in publication pipeline). MLOps SME Program Graduate. 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). 2 org-wide tech talks on Terraform testing and GitOps gating. Associate Speaker Certified.

Terraform, ECS on EC2, ALB, CodePipeline, KMS, IAM GitHub
◇ 15-module Terraform stack for zero-downtime blue-green deployments on ECS backed by an EC2 Auto Scaling Group – KMS encryption, ALB traffic shifting, and least-privilege IAM. Multi-account ready with separated networking, compute, and deployment layers; full CodePipeline automation for container builds and progressive traffic cutover.

Ledger Sync Jan 2026
TypeScript, React, FastAPI, SQLite Live | GitHub
◇ Personal-finance transaction reconciler with fuzzy-match dedup across bank statements and card exports; typed FastAPI backend, local-first SQLite store, React UI.

GitScope Mar 2026
JavaScript, Chrome Manifest V3, GitHub GraphQL, Cloudflare Workers Chrome Web Store | GitHub
