Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Hyderabad, India

- **MLOps Pipeline – SME Program Graduate (Jun 2025 – Aug 2025):** Architected end-to-end SageMaker Pipelines platform for medical image classification – training, model registry, blue-green endpoint deployment with weighted traffic shifting, auto-scaling, and Model Monitor drift detection with automatic rollback on breach. Provisioned full infrastructure as code via Terraform + CodePipeline; exposed inference through API Gateway + Lambda with CloudFront frontend for low-latency predictions. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0): 89 Terraform files across 14 reusable modules, clinical quality gates, and closed-loop drift retraining.
- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Built the AWS foundation for a data-centre exit and a second landing zone entirely in Terraform: Organizations OUs with Control Tower baselines, SCPs, tag policies, and least-privilege account baselines; 4,000+ resources across 20+ Terraform Cloud workspaces, none failing. Cut per-account setup by ∼90% (3+ days to under 4 hours). Delivered two Transit Gateway hubs with Network Firewall inspection and VPN/Direct Connect, plus self-service onboarding that gives each new workload its route table within 15 minutes.
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization, with organization-wide auto-enable in Terraform. Worked on the security solution behind 1,000+ preventative CCMv4.0 controls (team result). Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC patterns on high-sensitivity financial workloads. Used Amazon Q to accelerate code analysis and migration assessments.
- **Internal Impact:** Published a second AWS sample, Terraform for AWS Organizations governance on Control Tower (aws-samples, MIT-0), covering all six policy types, Control Tower controls, and delegated admin for 15 services. Published APG pattern "Secure PR Previews and Approval-Gated Releases for Amplify Gen 2" (plus 2 more peer-reviewed in publication pipeline). 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). Delivered 2 org-wide tech talks on Terraform testing and GitOps pipeline gating. Associate Speaker Certified.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Migrated on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy – zero-downtime releases. Instrumented X-Ray and CloudWatch distributed tracing for production observability.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized production application on AWS ECS/ECR with GitHub Actions CI/CD; deployed SonarQube on EC2 + RDS to embed continuous code quality gates into the delivery pipeline.
