Sagar Gupta

ProServe (Cloud Consultant) - DevOps/MLOps | Amazon Web Services (AWS) | Bengaluru, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

AI Tools & Developer Productivity Engineer with 2 years at AWS Professional Services as ProServe (Cloud Consultant) - DevOps/MLOps, building AI-assisted developer tooling and agent workflows on top of enterprise DevOps engagements. Ship production Claude Code custom skills, MCP servers, hooks, and agents; use Kiro for requirement analysis, architecture documentation, and implementation specs, and Amazon Q for code analysis on financial-services workloads. Maintain a public Claude Code plugin marketplace (16 plugins) and a Bedrock MCP server that puts 26 text models from 7 providers behind one set of credentials. 11 upstream PRs merged across axios, Apache Airflow, Prefect, Feast, awslabs/mcp, awslabs/agent-plugins, multer, and others – including Claude Code agent skills for Feast. 5x AWS TFC Ambassador (Agentic AI, AI/ML, CloudOps, NGDE Graduated, Serverless). 5x AWS certified.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
ProServe (Cloud Consultant) - DevOps/MLOps Bengaluru, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account setup from 3+ days to under 4 hours (~90%) by replacing a legacy account-vending pipeline with Terraform Cloud (OIDC) for a data-centre exit and a second landing zone: 4,000+ resources across 20+ workspaces, none failing.
  - Used Kiro and Claude Code for requirement analysis, specs, and design documentation. Stood up the second landing zone foundation in about four weeks, ahead of schedule.
  - Delivered two Transit Gateway hubs with Network Firewall inspection and VPN/Direct Connect, plus self-service onboarding: route table within 15 minutes, firewall access by tag in about a minute.
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization, with organization-wide auto-enable in Terraform. Worked on the security solution behind 1,000+ preventative CCMv4.0 controls (team result). Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC with Amazon Q.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Architected an end-to-end SageMaker MLOps pipeline for medical image classification with blue-green endpoints, auto-scaling, and drift detection. Provisioned infrastructure via Terraform + CodePipeline with CloudFront frontend and API Gateway + Lambda inference API. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample on Organizations governance (see Publications). Co-authored an AWS Prescriptive Guidance pattern on secure PR previews and approval-gated releases for Amplify Gen 2. 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). MLOps SME Program Graduate. Associate Speaker Certified; delivered 2 org-wide tech talks on Terraform testing and GitOps pipeline gating.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Migrated on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy, enabling zero-downtime releases. Established observability with X-Ray and CloudWatch distributed tracing.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized production application on AWS ECS/ECR with GitHub Actions CI/CD, and deployed SonarQube on EC2 + RDS to embed continuous code quality analysis into the delivery pipeline.

Publications & Recognition

- **Published by AWS:** aws-samples/sample-sagemaker-image-classification-mlops (author, MIT-0) – SageMaker MLOps in 86 Terraform files across 4 stacks and 13 modules: clinical quality and Fairlearn fairness gates, hourly PSI drift that starts retraining, canary deploys with auto-rollback. *2026*
- **Published by AWS:** aws-samples/sample-aws-terraform-org-governance (author, MIT-0) – Terraform for AWS Organizations governance on Control Tower: six policy types as 20 policy documents, delegated admin for 15 services. *2026*
- **LeetCode Guardian** (top 1.1%) – 2166 peak rating, 1300+ problems, 107 contests. GeeksforGeeks 500+ problems; HackerRank 6-Star Problem Solving.

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner **Anthropic badge**: Claude Partner Badge - Claude Code (Sep 2026)

Projects

orrery Oct 2026
Agent Skill, Claude Code Plugin, Node.js, ELK, SVG GitHub | Gallery
◇ Agent Skill that turns a YAML spec into animated architecture diagrams with 18,209 official icons (AWS, Azure, Google Cloud, Kubernetes, GitHub, IBM), each cloud pack rebuilt from the vendor's own download and pinned by checksum. ELK auto-layout, a validator whose every finding names the fix, and a review board of 3 reviewer agents; 40 reference diagrams are rendered and checked in CI. Runs in Claude Code, Codex, Cursor, Gemini CLI and Kiro.

Ledger Sync Jan 2026
React 19, TypeScript, FastAPI, SQLAlchemy, Neon PostgreSQL, Vercel GitHub | Live
◇ Self-hosted personal-finance app: imports .xlsx, .xls and .csv bank statements with SHA-256 transaction IDs so re-imports stay idempotent, then serves 26 analytics pages (Indian fiscal-year tax planning, investments, FIRE, multi-currency) and an AI assistant limited to 15 read-only tool calls. FastAPI on Vercel over Neon PostgreSQL, React on GitHub Pages, with 298 test files across both stacks.

Claude Cost Optimizer Mar 2026
Claude Code Plugin, MCP, TypeScript, React, Python GitHub | Live
◇ Claude Code plugin, MCP cost server, CLI grader and web calculator for Claude spend. Rebuilt every estimator on cache-aware billing, correcting a modelled 30-turn Opus session from $3.44 to $0.74, and replaced every vague savings range with a sourced or computed number. Golden-value tests pin the cost math in all three implementations.

skillcheck Jul 2026
TypeScript, Node.js, GitHub Actions, SARIF GitHub | Marketplace
◇ Conformance linter for Agent Skills: 36 rules with message-for-message parity to the skills-ref reference validator, SARIF 2.1.0 output and inline PR annotations. Ships as an npm CLI (284 downloads in the last month) and a GitHub Marketplace action.

itr-agent Jul 2026
TypeScript, MCP Protocol, Node.js, Zod GitHub
◇ Local-first MCP server for Indian income tax: the LLM interviews and calls 12 tools, while a deterministic engine over a versioned JSON rule pack computes every rupee. 151 tests pin it to published worked examples and the statute, on an Ubuntu and Windows CI matrix.

Other Notable Projects: Bedrock Multi-Model MCP (26 text models, 156 of 156 benchmark calls), Claude Skills Marketplace (Claude Code plugin marketplace, 16 plugins), MCP Toolkit (MCP server middleware packages), SelfHub (MCP personal-memory server), GitScope (Chrome Web Store extension).

Open Source Contributions (11 merged upstream)

- **axios** (109K☆) – AxiosError message now built from AggregateError sub-errors, ending blank dual-stack errors (#11059)
- **Apache Airflow** (47K☆) – template_fields on SalesforceBulkOperator, so its arguments render via Jinja at run time (#63109)
- **lucide** (25K☆) – Fixed a TypeError crash when Vue templates pass the kebab-case icon-node prop (#4512)
- **multer** (12K☆) – Files rejected by fileFilter no longer use up maxCount and fail later valid uploads (#1426)
- **terraform-aws-modules/atlantis** – Fixed custom ECS security group egress rules being silently replaced by allow-all (#446)
- **Also merged:** PrefectHQ/prefect, feast-dev/feast, awslabs/agent-plugins (#132, #212), awslabs/mcp, cloudposse/terraform-aws-tfstate-backend; co-author of the aws-ia/terraform-aws-vpc v4.8.0 fix.

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Technical Skills

AI Developer Tools: Claude Code (custom skills, MCP servers, hooks, agents, plugin marketplaces), Model Context Protocol (MCP), Kiro (AI-driven specs), Amazon Q Developer, GitHub Copilot, Cursor
Agents & LLMs: Agent orchestration, tool use, RAG pipelines, prompt engineering, Amazon Bedrock, Anthropic SDK, AWS SDK, LLMOps
Languages: TypeScript, Python, JavaScript, HCL, Bash, SQL
Cloud & Infrastructure: AWS (Lambda, API Gateway, Bedrock, SageMaker, ECS, Organizations), Terraform, Docker, GitHub Actions, CI/CD
Frameworks & Runtimes: Node.js, React, Next.js, FastAPI, Chrome Extensions (Manifest V3), Cloudflare Workers
Developer Practices: Test-driven development, tftest + PyTest, code review automation, open-source contribution workflows
