Experience

Amazon Web Services (AWS) Aug 2024 – Present
Cloud Consultant – Professional Services (DevOps/MLOps) Hyderabad, India

- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Built the AWS foundation for a data-centre exit and a second landing zone entirely in Terraform, replacing a legacy account-vending pipeline: 4,000+ resources across 20+ Terraform Cloud workspaces, none failing, with per-account setup cut from 3+ days to under 4 hours (~90%). Delivered two Transit Gateway hubs in separate AWS Regions with Network Firewall inspection, plus self-service onboarding that gives each new workload its route table within 15 minutes. Won approval for AWS IPAM by measuring real billing in a sandbox (about 94% lower projected cost). Used Kiro and Claude Code for specs and design documentation.
- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened 38+ services to application teams. Designed Amazon Detective enablement via an AFT customization, with organization-wide auto-enable in Terraform. Project closed with a 10/10 CSAT.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native IaC patterns on high-sensitivity financial workloads. Used Amazon Q to accelerate code analysis and migration assessments.
- **MLOps Pipeline (SME Program, Jun – Aug 2025):** Built end-to-end SageMaker medical image classification pipeline with blue-green endpoint deployment, auto-scaling, and drift detection – zero-downtime model updates with automatic rollback. Provisioned via Terraform + CodePipeline; CloudFront frontend + API Gateway + Lambda inference. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Second AWS Sample:** Terraform for AWS Organizations governance on Control Tower (aws-samples, MIT-0), covering all six policy types, Control Tower controls, and delegated admin for 15 services.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Migrated on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy for zero-downtime releases. Established distributed tracing with X-Ray and CloudWatch.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized production application on AWS ECS/ECR with GitHub Actions CI/CD; deployed SonarQube on EC2 + RDS to embed continuous code-quality analysis into the delivery pipeline.
