Sagar Gupta

Cloud Consultant – DevOps / MLOps | AWS Professional Services | Hyderabad, India

sagargupta.online | Sagargupta16 | sagar-gupta-16-10 | sg85207@gmail.com | +91-8770532413

Summary

Platform Engineer / Cloud Consultant at AWS Professional Services delivering self-service infrastructure platforms and multi-account governance for regulated enterprises. Wrote Terraform for about 10 AWS services on State Street's landing zone team, part of the path that opened 38+ services to application teams. Built RWS's AWS foundation in Terraform with self-service network onboarding, cutting per-account provisioning from 3+ days to under 4 hours (∼90%). 5x AWS certified. Published APG pattern on Amplify Gen 2 approval-gated releases (plus 2 more peer-reviewed in the publication pipeline). 11 upstream PRs merged across axios, Airflow, lucide, Prefect, Feast, awslabs/mcp, multer, and others.

Experience

Amazon Web Services (AWS) Aug 2024 – Present
Cloud Consultant – Professional Services (DevOps/MLOps) Hyderabad, India

- **DevOps Consultant – State Street (Oct 2024 – Aug 2025):** Built Terraform for about 10 AWS services with automated tests (tftest + PyTest) on the regulated landing zone team, part of the path that opened **38+ services to application teams**. Designed Amazon Detective enablement: delegated admin moved from the Control Tower management account to the Audit account via an AFT customization, with organization-wide auto-enable in Terraform. Worked on the security solution behind **1,000+ preventative controls** aligned with CCMv4.0 (team result). Project closed with a **10/10 CSAT**.
- **Lead DevOps Consultant – RWS (Feb 2026 – Present):** Cut per-account provisioning from **3+ days to under 4 hours (∼90%)** by moving account vending off a legacy pipeline into Terraform: Organizations OUs with Control Tower baselines, SCPs, tag policies, and least-privilege account baselines with IAM Identity Center, AWS Backup, and SSM Patch Manager in every workload account. Built **self-service network onboarding** on two Transit Gateway hubs: each new workload gets its route table within 15 minutes and firewall access by tag in about a minute, with no network-team ticket. Every change ran in a sandbox mirror first through the same least-privilege role.
- **DevOps Consultant – DTCC (Aug 2025 – Nov 2025):** Modernized legacy Terraform to cloud-native, module-driven IaC on high-sensitivity financial workloads – standardizing state, provider, and module patterns so downstream teams inherit the platform contract by default. Used Amazon Q to accelerate code analysis and migration assessments across the estate.
- **MLOps Platform (SME Program):** Provisioned the platform layer for a SageMaker medical-image classification pipeline via Terraform + CodePipeline – blue-green endpoints, auto-scaling, drift detection, CloudFront frontend, API Gateway + Lambda inference – exposing MLOps as a repeatable pattern rather than a bespoke build. Generalized and published by AWS as an official open-source sample (aws-samples, MIT-0).
- **Internal Impact:** Published a second AWS sample, Terraform for AWS Organizations governance on Control Tower (aws-samples, MIT-0), covering all six policy types, Control Tower controls, and delegated admin for 15 services. Published APG pattern *Secure PR Previews and Approval-Gated Releases for Amplify Gen 2 with GitHub* (2025), plus 2 more peer-reviewed in the publication pipeline. MLOps SME Program Graduate. **5x TFC Ambassador** (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). 2 org-wide tech talks on Terraform testing and GitOps pipeline gating. Associate Speaker Certified.

Amazon Web Services (AWS) Mar 2024 – Jul 2024
Associate Professional Services – DevOps (Internship) Hyderabad, India

- Enabled zero-downtime releases by migrating an on-premises application to AWS ECS with blue-green deployment via Terraform, CodePipeline, and CodeDeploy. Established observability with X-Ray and CloudWatch distributed tracing.

Ikarus-3D May 2023 – Jul 2023
Software Developer Associate (Internship) Mohali, India

- Containerized a production application on AWS ECS/ECR with GitHub Actions CI/CD, and deployed SonarQube on EC2 + RDS to embed continuous code-quality analysis into the delivery pipeline.

Industry Certifications (5)

AWS: Solutions Architect – Associate | Developer – Associate | Machine Learning Engineer – Associate
AWS: AI Practitioner | Cloud Practitioner

Education

National Institute of Technology Warangal, Telangana Sep 2021 – Jul 2024
Master of Computer Applications (MCA) | NIMCET AIR 208 CGPA: 8.38

Sanskar College of Professional Studies (DAVV University), Indore May 2018 – Aug 2021
Bachelor of Computer Applications (BCA) CGPA: 7.34

Projects

Blue-Green AWS Terraform Platform Jul 2025
Terraform, ECS on EC2, ALB, CodePipeline GitHub
◇ Reference platform pattern for zero-downtime service deployment on AWS – Terraform-provisioned ECS on an EC2 Auto Scaling Group behind ALB with CodePipeline blue-green cutover and automated rollback. Packaged as a reusable module template with tftest coverage.

Bedrock Multi-Model MCP Server Apr 2026
Python, MCP Protocol, AWS Bedrock GitHub
◇ Internal-tooling MCP server exposing 500+ Bedrock models behind a single Model Context Protocol endpoint – lets Claude Code, Cursor, and other agent hosts route through one contract instead of per-model glue.

Claude Cost Optimizer 2026
TypeScript, React, Claude API Live
◇ Developer tool that models prompt-caching, batch, and model-tier tradeoffs to cut Claude spend by 30–60% – built for platform teams standardizing LLM usage across product lines.

GitScope Mar 2026
JavaScript, Manifest V3, GitHub GraphQL, Cloudflare Workers Chrome Web Store
◇ Chrome extension surfacing repository health signals (CI, dependencies, contributor activity) inline on GitHub – Cloudflare Workers proxy caches GraphQL responses to stay under rate limits.

Ledger Sync Jan 2026
TypeScript, React, FastAPI, SQLite Live
◇ Personal-finance transaction reconciler with a typed API contract between React frontend and FastAPI backend – used as a template for internal FastAPI + React stacks.

Other Notable Projects: SelfHub (MCP + MongoDB), LeetCode Rating Predictor (121K+ records, MAE ∼7.8), Instagram Likes Leaderboard, GroundZeroNN, StockSage. See github.com/Sagargupta16.

Open Source

11 upstream PRs merged – prioritizing platform, IaC, and agent-tooling projects:
aws-ia/terraform-aws-vpc v4.8.0 (merged): Root-caused why the Cloud WAN attachment was destroyed and recreated on unrelated changes when `create_vpc = false`; the fix shipped co-authored in the official AWS-IA module.
axios #11059 (merged): Synthesized the `AxiosError` message from `AggregateError.errors` so dual-stack connection failures surface actionable detail instead of an empty message.
Apache Airflow #63109 (merged): Added `template_fields` to `SalesforceBulkOperator` so operator args resolve via Jinja at runtime.
HashiCorp terraform-provider-aws #46867 (open): IoT CloudWatch metric substitution validation – hardens platform-team guardrails against malformed metric templates.
PrefectHQ/prefect #20956 (merged): Documented deployment-steps-as-Python, clarifying the platform contract for deployment authors.
feast-dev/feast #6081 (merged): Shipped Claude Code agent skills for Feast to standardize how teams work with the feature store.
awslabs/agent-plugins #132 (merged): Added a `defusedxml` guard to the extension loader, closing an XXE surface in agent-plugin ingestion.
lucide #4512 (merged): Fixed the Vue Icon component to accept the kebab-case `icon-node` prop, removing an undefined-render crash.

Technical Skills

Platform & Governance: AWS Organizations, SCPs, Tag Policies, Landing Zone, Control Tower, AWS Config, Security Hub, IAM Identity Center, Service Catalog, CCMv4.0 controls
IaC & Module Design: Terraform (module libraries, tftest, PyTest, remote state, provider pinning), HCL, Terragrunt, semantic versioning, module registries
CI/CD & Developer Experience: GitHub Actions, CodePipeline, CodeBuild, CodeDeploy, OIDC federation, approval gates, blue-green and canary deployments, GitOps
Networking & Cloud Services: Transit Gateway, Direct Connect, VPN, centralized egress inspection, VPC, PrivateLink, Route 53, ECS/Fargate, Lambda, API Gateway, EventBridge, CloudFront, CloudWatch, X-Ray
AI-Assisted Platform Tooling: Claude Code (custom skills, MCP servers, hooks, agents), Amazon Q, Kiro, MCP Protocol, GitHub Copilot
Languages: Python, HCL, TypeScript, JavaScript, Bash, SQL

Achievements

Competitive Programming: LeetCode – 1300+ problems solved, 2166 peak rating (Guardian badge, top 1.1%), 107 contests. GeeksforGeeks – 500+ DSA problems. HackerRank – 6-Star Problem Solving, 5-Star C++.
Competitions: **Rank 1289 (Top 5%)** Google Kick Start Round E '22 (Sep 2022). 1st place – Coding Cauldron '23 (NIT Trichy) and QFiesta IGNOSI '22 (NIT Warangal). 2nd place – Manage the Damage '23 (NIT Trichy) and Trial By Code IGNOSI '22.
Academic: NIMCET AIR 208 (2021). MCA CGPA 8.38, First Division with Distinction, NIT Warangal.
Recognition: 10/10 CSAT (State Street) and two 10/10 customer satisfaction surveys (RWS), both team results. 5x TFC Ambassador (AI/ML, NGDE Graduated, CloudOps, Agentic AI, Serverless). MLOps SME Program Graduate. Associate Speaker Certified.
